December 21, 1955

Dear Allen:

Attached is a letter Lloyd wrote me summarizing his impressions after his recent trip in Europe. While this report makes no pretense of being based on "scientific" methodologies, I know you share my feeling that Lloyd is an unusually sensitive observer. Hence I thought this might be of value to you.

If Lloyd does not see you when he delivers this, we hope sometime after the holidays at your convenience we can report on the progress of the research in which you expressed an interest.

As ever,
